

1- Context

- Public health preoccupied with successfully scaling up innovations
- Evolution of innovations has to be

4- Scaling up and frames

Importance of issues' conceptualization for public action and programs: inertia or catalytic effects towards social change ^[12]

5- Conclusion

The frame concept allows to:

 \succ consider scaling up starting

understood to ensure scaling up success

Objective

To demonstrate the « frame » concept's relevance for the scaling up of health promotion innovations focused on equity (HPIE)

2- Scaling up

Organizational process of expansion of promising innovations ^[1-3]

increasing impact and sustainability

- \succ from sparse innovations to programs
- \uparrow the number of actors \square evolution
- May impact the way it successfully

Scaling up process:

New contexts: heterogeneous actors from multiple sectors

Expansion and consolidation of action netwoks

Public health leads the process

Ongoing process of learning

Integration into the routines of health organizations

- Precision / "crystallization" of actions around specific roles
- Negociations regarding conceptualizations pertaining to HPIE

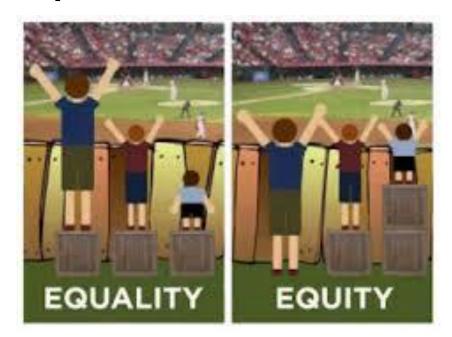

from relations between actors

- follow HPIE evolution in terms of differences in conceptualizations of issues
- foster knowledge development on public health's role regarding this evolution
